There was a special town meeting on Tuesday evening for the purpose of voting \$3,000 to the Reliance Worsted company, a sum which had been promised them when they came here, for their expenses by the railroad company. That promise was a verbal one by the late President Hall, but President Mellen would not carry it out, and the matter has been before the bdard of trade and a previous town meeting. At the latter the selectmen were authorized to bring it before the legislature to get the authority to appropriate the town's money for such a purpose. This having been granted by the legislature, provided the amount was appropriated by a town meeting, and the special meeting was called, and resulted in the amount being voted. No provision was made in the estimates at the annual meeting for it, and the amount will have to be borrowed, as was the \$5,000 for the town celebration and the \$4,500 for the Otis library this year.

> DENTAL FORCEPS IN ANTIQUITY. Proof That They Existed, But No Specimens Are in Existence.

Dr. Sudhoff not long ago read a paper before the Leipzig Medical society on dental forceps in antiquity. He said that even before the time of Hippocrates reference to the use of such instruments are found, but no specimens are met with among the surgical implements belonging to classical times that have been discovered. This can only be due to the material of which they were made. Unlike the mass of other Graeco-Roman surgical instruments, which were nearly all of bronze, the dental forcers of antiquity must have been made of iron or steel, although no medical writer mentions the fact. In the Aristotelian "Mechanical Problems," however, there is a pas-sage which, according to Dr. Sudhoff, annual meeting of the grand lodge, as all past noble grands are entitled to attend.
